

Health & Safety Policy

Shockout Arts

Policy Statement

Shockout Arts is a Dance School offering Full time courses in Professional and Commercial dance.

The school currently operates from Studio 25 located at 25 Church Street in Manchester City Centre. The premises at Church Street has 8 Dance studios in full use along with 5 offices, staff room, common room, 3 changing rooms and break out areas for students.

All staff and students have a right to operate in an environment where risks to their health and safety are properly controlled. As a dance school it is our policy to maintain safe and healthy working conditions, equipment and systems of work for everyone involved, and to provide such information, training and supervision as necessary for this purpose. This policy relates to Shockout Arts teaching practice and our role as a dance school.

Where reasonably practicable, this policy will seek to provide and encourage:

- A safe place to work and safe dance environment, with safe access to and from it.
- Safe arrangements for the use, handling and storage of equipment.
- Sufficient information, instructions, training and supervision to ensure any/all employees are well equipped to avoid hazards and contribute positively to effective Health & Safety at work.

The policy will be kept up to date, particularly as the organisation changes in nature and size, to ensure that our responsibilities are met in relation to:

- Health & Safety at Work Act (1974)
- Management Regulations (1999)
- Other relevant current legislation

Responsibility of Shockout Arts

As a dance school and employer, it is Shockout Arts responsibility to:

- Decide what could harm staff/students and the precautions necessary to stop it.
- Complete all necessary risk assessments before each dance class.
- Explain how risks will be controlled and tell staff/students who is responsible for this.
- Consult and work with any staff we employ in order to protect everyone from harm in the work place or dance environment.
- Provide necessary Health & Safety training for any staff employed.
- Provide a first aid kit for dance classes and maintain an accident book.
- Ensure that a number of staff members are trained first aiders and place a list of these on the notice boards around the buildings.
- Report any major injuries to the Health & Safety Executive.
- Have the appropriate insurances in place. This includes displaying Public Liability insurance certificates where they can be easily read.
- Work with any other employers sharing work place or dance studio to ensure that everyone's health and safety is protected.
- Obtain DBS numbers from all guest teachers.
- Ensure safe storage/use of substances or any Hazardous products is locked away and no one under the age of 18 allowed access.

Responsibility of All Staff Involved to:

- Help maintain the safety and security of students/visitors/guest teachers in the working/dancing environment.
- Be aware of risks, knowing the appropriate action to take and identifying any potential safety issues.
- Ensure reasonable care is taken during their work activities to avoid accidents or injuries to themselves, students and other people in the vicinity. (See attached document on Safe Dance for Students).
- Report all potential hazards affecting Health & Safety to the Operations Manager.
- Report all accidents and record in the accident book.
- Follow any training received when using equipment or materials in a class.
- Observe all safety instructions and procedures incorporated in the Health & Safety Policy.
- Co-operate with Shockout Arts (the employer).

Key Policy Guidelines and Instructions

1. Accidents and First Aid

- All accidents should be recorded in the accident book. The accident book is kept at the reception desk.
- Treatment should be given only by a trained First Aider.
- Any treatment should be as little as necessary without threatening the student's wellbeing.
- If a student comes to a member of staff for comfort because of minor accident or fright, it is not acceptable to hold their hand or put arms around them but just to ensure that the injury is known and do nothing to make it worse.
- Medication should not be offered to any student/staff, this includes antiseptics or pills of any kind.
- If in doubt with any minor injury or illness suggest that they visit the Walk in Centre on Market Street or if serious injury phone the emergency services 999. It is always best to stay with the student and wait for the ambulance.
- We would only take the risk of taking a student to hospital ourselves if the emergency services asked us to do so because of exceptional circumstances.

2. Safety Checks

a) Equipment

Correct storage of equipment is vital to minimising risks. Any equipment not being used is a potential risk. Every piece of equipment that is being used must be checked at the beginning of the dance classes to ensure its safety. In addition, care must be taken to:

- Make sure all equipment/resources used are safely and securely stored after each session.
- Any damaged equipment is removed for use.
- Ensure that leads are in good working order.
- Ensure that the built in audio system is switched off after each class.
- Identify when/where safety mats should be used and ensure that they are used correctly.
- Ensure that students are shown how to use equipment correctly and safely.
- Ensure that no student is able to access equipment without supervision.
- Ballet barres to be moved by two people.

- Any extra heating required and fan heaters are not placed in a potentially hazard area.

b) Dance Studio

Before students enter the studio it is our responsibility to ensure:

- Floors are clean with foreign bodies removed.
- Check if any mirrors are unbroken.
- Check plug sockets are safe with no wires showing.
- Check any blinds or sheeting are in a stable condition and not falling/fallen down.
- Ensure doors and exits are secure and there is nothing blocking emergency exits.
- Identify any light fittings/light switches that are not working or loose.

c) Students

- Ensure that all students are wearing appropriate dance wear and footwear to minimise accidents or risk.
- Safety/protection clothing must be worn when appropriate eg. Knee pads

3. Fire Safety

There is a No Smoking Policy. Smoking is not permitted anywhere around the building outside.

It is crucial that all staff to include teachers and guest teachers involved in classes maintain a working knowledge of the fire procedure for the building in which they are working, including location of fire alarms, all students will gather at the designated meeting point. This is at the back of the building.

A register of students must be taken at the start of every class and it is the Dance Lecturer/Guest Lecturer's responsibility to ensure that this is done, therefore It is important that all students and staff members tap in and out of building at reception at all times during the day.

In the event of a fire/fire alarm, all students must gather at the designated meeting point, and the Fire Marshalls must complete a roll call and liaise with Fire Service Personnel (See general fire evacuation document below).

Fire Risk Assessments takes place once a year, copy of this kept online.

4. Security

- Anyone wishing to enter the dance session that is not a student must be escorted by a member of staff.
- Any unidentified person seen on the premises must be reported to Senior Management or member of staff.
- Any suspicious items must be reported to receptionist or a member of staff.
- The reception door to be kept locked with the buzzer being used at all times.

Shockout Arts
Health & Safety
Safe Dance Practice

Shockout aspires to:

- Excellence in dance performance
- Health and effective dance training/teaching
- Fit, healthy, confident, accomplished dancers providing positive role models for future generations.
- Responsible employment taking into account dance specific industry recommendations in addition to statutory health and safety requirements.
- Continuing professional development.

All dancers have a right to:

- Be taught safely and effectively by an appropriately qualified and experienced Dance Lecturer/Choreographer.
- Education in and access to up-to-date information on healthy dance practice, injury prevention and dance science.
- Access to affordable and fit for purpose medical healthcare and dance science services.
- Safe and appropriate spaces to work in.
- A working environment that is conducive to psychological as well as physical health in order to meet the performance demands of the dancer.

Dance Education and Training

This will include the following for Students.

- A basic introduction to warming up and cooling down, nutrition and applied anatomy (including the growth spurt), demonstrated through teaching.
- Clarity from the dance lecturer for students on why these are important and how to apply to healthy dance practice.
- Signposts to further information for students.
- Education in how the interrelated areas of anatomy, physiology, biomechanics, psychology and nutrition apply to dance practice and performance.
- Essential information on injury and management as outlined in this document.
- Essential information on the growth spurt.

- Dance spaces – what the requirements for safe and optimal dance practice are and how to mitigate risk in circumstances that aren't ideal.

Dance Lecturers/Choreographers

To include the above and the following:

- The application of the above in and through the teaching of dance.
- Basic first aid and the contents of a dancer's first aid box.
- Continuing Professional Development (CPD) on the above subjects to be undertaken at least every 6 months.
- Being a member of appropriate network/organisation that will provide access to up-to-date information and news of development in the field.

Professional dancers, choreographers, dance lecturers and guest teachers will keep themselves regularly updated on the latest best practice for dancers' health, wellbeing and performance appropriate to their position.

Students to ensure they have:

- Regular assessment – musculoskeletal, health, fitness, - to monitor for improvements/problem areas, helping to assess effectiveness of the training for that individual.
- Supplementary training provided as needed and recommended for individuals following individual assessments.
- Access to (at minimum) a dance knowledgeable physiotherapist, pilates, (or other body conditioning practitioner) nutritionist and counsellor as well as registration with a local GP.
- Longitudinal monitoring of injury for analysis in order to spot trends, mitigate identified causes of injury and inform resource provision and training.
- Access to an appropriate medical insurance scheme.

Injury Prevention and Management

1. Dance Lecturers/Choreographers/Guest Teachers to ensure that appropriate warm up is performed at the beginning of each class.
2. Ensure that stretching is emphasised to students after each class
3. Lean Exercises/activities are performed in a smooth, careful manner
4. Increase in amount of training is gradual to avoid any stress fractures
5. Any student injured do not take place in any dance classes until they are fully recovered from injury.
6. Dance Lecturer/Choreographers/Guest Teachers to be aware of any student who will be going through the growth spurt.

Working Environment

The dance studios within Church Street premises requirements offer safe and optimal dance practice are:

- Clean, suitably sprung floor with the appropriate surface for the relevant classes.
- High ceiling to allow jumping, leaping and lifting without obstruction.
- Enough space so that when limbs are outstretched each dancer has enough personal space not to come into contact with an obstruction/fellow dancer.
- Natural lighting (for regularly used rehearsal spaces and studios).
- Well ventilated studios, air conditioning to be used as and when required.
- Heating able to be maintained at a comfortable 21c not going below 18c

Health & Safety & Safe Dance Practice for Students

All students whilst participating in dance and movement should feel comfortable, safe and be able to participate without risk or injury.

- **Medical Form** - This form should be completed by all students before commencement of any courses at Shockout Arts Dance School.
- **Fit to Dance?** It is always advisable to consult your doctor before beginning a new dance course and essential if you have a pre-existing health problem.
- **Clothing** - make sure that your clothing is comfortable and not restrictive ie. leggings or stretchy trousers. Please wear appropriate soft soled footwear for the relevant dance class. A notepad is useful for your own notes.
- **Warm up** – At the beginning of the day all students warm up at 8.30 am. The importance of a warm up to prepare the body for physical exertion this cannot be emphasised enough.
- **Cool Down** – Each dance class should also include a cool down when the lesson ends. The cool down is as important as the warm up to prevent you suffering muscle pain, strain or injury.
- **Stretching** – This cannot be emphasised enough stretch, stretch, stretch after a full day of dancing. You can stretch before you go to bed if you have to!!
- **Self Awareness** – You are encouraged to pay attention to how your body feels when moving. You do not need to stress and strain to attain perfect technique as this can cause injury. Relax and maintain good posture and spend plenty of time practicing! Students should learn to listen to their own bodies and interpret its signs in order to avoid pushing themselves too far.
- **Posture affects** your breathing and it can make or break your dance; it affects how your body feels, moves and looks and good posture is essential to ensure non injury. You will be constantly reminded to check your posture and will be corrected if necessary.
- **Technique** – Technical knowledge and correct application of a movement is essential to avoid injury. You will be observed and corrected if necessary. Further breakdown and advice may be given. If you are not sure please ask!
- **Alignment** – The proper body alignment for dancing is crucial. The head, neck, chest and abdomen should be in alignment so that the weight is even and centred, with minimum of effort and strain on muscles and ligaments.
- **It is important** to feel grounded and centred when you begin, remember to bring down your energy and centre yourself in your lower belly/pelvis area, tying a scarf around your hips will help to focus on that area. Maintain even breathing.
- **Take care of yourself** and remember that pain is not progress but can often be a warning sign that the body has gone too far. If you are struggling, ask for help, take time to stop and observe you can still learn whilst watching. Stop at once if you feel dizzy or have any pain.
- **Be responsible.** Please show respect to your teacher and the other members of your class. If you arrive late/leave early/sit out for long periods; you shall be responsible for warming up/cooling down and stretching to avoid injury.
- **Nutrition** – It is important that you had a balanced nutritious diet and drink plenty of water daily.

- – ensure all your personal belongings and outdoor clothing are stored in a safe way to avoid hazards. Eg. Hallways around the building, changing rooms.
- **Jewellery** – For your own safety do not wear earrings, bracelets, ankle jewellery during classes.
- If you are pregnant or have any health issues please inform your dance teacher, as this will not stop you participating, but there are precautions that you should be aware of.
- Finally - There is a lot to take in and think about just remember when taking part in classes and workshops that everybody learns at their own pace and everyone is different. You will find some of the moves easier to do than others this is normal. It is always best if you want to become a professional dancer you have to train, practice and listen. As we say here at Shockout *Train Insane or Remain the Same!*
- *Relax, enjoy the dance course and have fun at the same time* 😊

FIRE EVACUATION PROCEDURE

If you discover a fire

- Activate the fire alarm.
- Do not delay your evacuation, on leaving where possible check all the corridors, toilets etc. to make sure no one is left behind.
- Keep calm and try to keep others calm.

In the event of hearing the fire alarm

The emergency evacuation alarm is a siren. If the alarm sounds, you should evacuate the buildings following the procedures set out below.

Tutors/Instructors are responsible for yourself and the students in your class.

- Evacuate the students in your class from the building immediately on hearing the alarm by using the nearest fire exit. Where possible take a head count. **DO NOT** stop to collect any personal belongings or equipment.
- **Do not** use the lift.
- Assist disabled students as required. In the event any disabled student is unable to be evacuated, you should assist the member of staff to ensure the fire service is aware of the location of the disabled student, and any other relevant information which may assist in the evacuation of that student.
- Students - if you are concerned that another student has not been able to evacuate the building, you should advise a member of staff of that person's last known location.
- Assemble at the fire point and supervise an orderly and quiet line.
- Dance Lecturer/Staff member will take the register and wait for further instructions – any absences or concerns should be reported immediately to the Head of Dance, Operations Manager or a Staff Member.
- **Do not** re-enter the building until you are informed to do so by the Head of Dance/Operations Manager/Staff Member.

ShockOut®
A Step above the rest

- **The meeting point for Church Street premises is Red Lion Street (next to Church Street Car Park)**
